3-IT. DEPARTMENT OF INFORMATION TECHNOLOGY (cont'd)
Electronic Monitoring Devices

Remarks: (cont'd)

The primary purpose of this contract is to employ electronic monitoring released to DPSCS and DJS including inmates nearing community release, parole violators, violent “high risk” offenders as well as sexual offenders. The technology used on these tracking devices will monitor and enforce curfews, and create inclusion and exclusion zones to monitor compliance with treatment and other conditions, as well as restrictions on potential victim contact. A cloud-based system is accessible through an interface through which the State will have access to perform all administrative, operational and monitoring functions. Offenders are to be monitored in real time 24/7/365. The Command Centers will provide electronic coverage by monitoring and sending out the notifications and absent without leave notifications. Monitoring includes phone checks, home visits, and requesting law enforcement assistance when needed.

A U. S. Department of Justice grant will pay for the first year of the contract. The out-years will be funded through combinations of grants and State general funds.
