Section 3 – Scope of Work

Background

The Geographic Information Officer's Office is responsible for maintaining the MD iMap system (<u>www.imap.maryland.gov</u>). It is also tasked with migrating many of the existing mapping applications, developed in Adobe's Flex system to a format, such as JavaScript/HTML5 that is compatible with the iOS and Droid smartphone operating systems. DoIT and the Offeror will negotiate the exact method(s) to be employed. Migration work will be prioritized. Additionally, the unit is beginning to utilize ArcGIS Online Premium so building online maps using this cloud capability may be required.

DoIT plans to contract a maximum of two candidates through this RFR.
