Section 3 – Scope of Work	
Background	
<p>The Patient Protection and Affordable Care Act of 2010 (ACA) – the national health care reform law – provides Maryland with the opportunity to dramatically improve health care for MD across a number of areas: insurance & coverage, health care delivery, quality and control, and information systems. One major area of focus both under ACA and for DHMH, is to avail the reform opportunity around Maryland’s Medicaid program. To this end, policy, operations and key information systems are a top focus. There are three immediate priorities in implementing key information systems to support ACA implementation around Medicaid for MD: developing an eligibility and enrollment interface, migrating an existing health system of record (case management), and establishing the marketplace for individuals and small businesses to select care options. As a recipient of a federal innovator grant, Maryland will provide updates on its progress in defining and implementing key information systems strategies across these three areas to the US Department of Health and Human Services as well as other states on an ongoing basis. Maryland expects to be a leader in implementing health care reform and the Systems Analyst will play a critical role in ensuring MD’s success.</p>	
Job Description/s	
Labor Category/s (From Section 1 Above)	Duties / Responsibilities
1. Senior Systems Analyst	<p>The Senior Systems Analyst role provides a unique opportunity for the selected candidate to influence the technology decisions for ensuring timely deployment of the Health Care Reform Exchange. Immediately, the individual would provide a systems view for DHMH on the underlying new eligibility enrollment system for Maryland and begin working on the systems analysis for interfacing with the CARES System (legacy system), MMIS (Medicaid Management Information System) and the new Health System of Record / Case Management DB. The role involves evaluating all DHMH requirements, considering solutions proposed by COTS vendors and identifying the best fit for DHMH requirements. The individual will also be responsible for ensuring proper interaction between various systems in a large, complex, multi-technology collaborative service oriented environment. This position promises to be an exciting and rewarding opportunity by being at the forefront of activities related to Health Care Reform in the United States.</p> <p>It is expected that the individual has experience in architecting large scale enterprise systems</p>
