

# The facts about **INSIDER THREATS**

## **Accidents are insider threats too!**

Not all insiders are malicious. Accidental insiders may cause damage when they make mistakes or let an attacker inside.

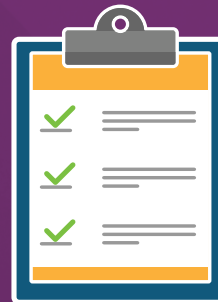

## **Insider threats come in many forms.**

Malicious insiders may seek money, data, access ... or simply a chance to cause some damage.

## **Don't rely on programs.**

Remember: Human error beats machine security. Don't let your guard down just because you have an antivirus and a firewall.

## **Small mistakes create big problems.**

"I'll bend the rules just this once" is never a good idea. The rules are there for a reason! Follow policies and procedures, and you keep your customers and your organization safe.

**JUST  
THE  
FACTS**
