The facts about
Public Wi-Fi

Avoid using public Wi-Fi if possible.

Public Wi-Fi can be dangerous and a source of malware. If you can avoid it, keep away!
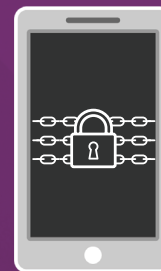

Secure your device.

Disable network auto-join and automatic file sharing.

Verify that a network is legitimate before joining.

If you have to use public Wi-Fi, reach out to the business or provider to verify which network you should be joining and what the password is.

Use encryption!

Encrypt your device and use a VPN to protect yourself while using public Wi-Fi.
