1 PROCEEDINGS 2 (2:02 p.m.)3 MS. ZIEGENHEIN: Good afternoon, everybody, and welcome to the Pre-Proposal Conference for the Central 4 5 Collection Unit's Debt Collection Information System 6 Request for Proposal. My name is Donna Ziegenhein, and 7 I'm the Procurement Officer for this project. And I'd like to introduce the rest of the team today, starting at 8 9 this end. 10 MR. LAWYER: My name is Jesse Lawyer. I'm the 11 Deputy Director of the Central Collection Unit. 12 MS. FOSTER: Montez Foster, Fiscal Administrator for Central Collections. 13 14 MS. GRAHAM: Sheila Graham, Deputy Project 15 Manager for the CCU Modernization Project. 16 MR. WOODARD: David Woodard, Program Manager 17 for the CCU Modernization Program. 18 MS. CROPPER: Stacia Cropper with the 19 Department of IT. 20 MR. FUGETT: Tony Fugett, the Director of the 21 Central Collection Unit.

MR. BRISTOW: Chuck Bristow, Maryland 1 2 Department of Transportation. 3 MR. CARREY-BEAVER: Doug Carrey-Beaver, counsel for the Department of Information Technology. 4 5 UNIDENTIFIED SPEAKER: -- want to introduce anybody else. 6 7 MS. ZIEGENHEIN: Okay. I'm going to make sure -- has everyone signed in? There were sign-in sheets 8 9 floating around. If you haven't, please make sure that 10 you see me. Make sure that you have signed in. And 11 also, if you have a business card, I need at least one 12 business card from everybody. And does everybody have a 13 copy of the agenda? Okay. 14 The purpose of today's conference is to give 15 potential bidders information and guidance on the 16 requirements of this procurement. Today's session is 17 merely for guidance. You should not rely on any verbal 18 communication for information. Questions must be

I'd like to review a few important areas in the

21

a formal response.

solicitation. And be sure to review the Key Information Summary Sheet on page 3. Proposals are due on July 19th at 2 p.m. This is a change. The original due date has been changed by Amendment 1, and it was posted last week. Proposals may not be submitted by e-mail or fax. All of the solicitation is important, but there are some critical information sections that we'd like to go over today.

In Section 2.3, Minimum Qualifications, be sure you address all minimum qualifications in your technical proposal. The minimum qualifications are on page 39.

Submission requirements are extremely important as well. Section 3 is where you'll find all the submission requirements. Pay very close attention to the instructions. Your proposals must be submitted in two separate volumes: Volume 1, Technical Proposal; Volume 2, Financial Proposal. Each volume is to be in a separate sealed package. Supply one unbound original and five copies of each technical and financial. Also you must include an electronic version of Volume 1, the technical in Microsoft Word format, and an electronic version of

- Volume 2 the financial, in Microsoft Excel format, marked 1 2 appropriately and stored separately. The electronic 3 version may be a CD or a flash drive, and this was also in Amendment 1. This is a change. Pay particular 4 5 attention to 3.4.2, format of the technical proposal. Ве 6 sure to include in your technical all the required 7 documents and signed affidavits for Section 3.4.2.9, located on page 56. 8
 - The MBE requirements on this solicitation, there is a zero goal. However, we strongly encourage wherever possible MBE participation.
 - Are there any Maryland-certified MBE companies here today?
- 14 | MS. DAWSON: Yeah.

9

10

11

12

13

15

16

17

18

19

20

- MS. ZIEGENHEIN: Would you stand up for a moment, introduce yourself and just tell us what services your company offers?
- MS. DAWSON: Susan Dawson. My company is

 FosterKnowledge. We provide training, technical writing,

 documentation -- testing --
- 21 MS. WONG: Beth Wong, Powersolv, Inc. We are a

system application integration. We also provide training, electronic document management -- professional services.

MS. ZIEGENHEIN: Thank you. Next I'd like to remind everybody a few important things on the price sheets. I'm not going to read all of the price sheet information, but some real important items. All fixed prices and unit prices must be clearly entered in dollars and cents, and cannot be contingent on any other factors or conditions. NO Cost items must be entered in zero dollars and zero cents. Every blank in the price sheet should be filled out with relevant data. It's imperative that all price sheets are entered correctly. Pricing must be provided for out-of-the-box functionality.

Once again, the price proposal should be sealed and then separate from the technical proposal.

For communications and questions, all communications, again, must be in writing for an official response. Questions should be sent by e-mail to me. My e-mail address is located on the agenda that was handed out today. There was a question and answer document

number one, which was posted on eMaryland last week, and hopefully everybody was notified of that by e-mail or by eMaryland.

The contract will be awarded to the most advantageous offer to the State considering all the evaluation criteria located in Section 4.

And just a reminder before I turn it over to David and his team to overview the project, if your proposal is late even by a minute, I cannot accept it. There are no exceptions to this rule. So please give your company plenty of time to allow the proposal to reach my office.

Now, David, would you like to give an overview of the project?

MR. WOODARD: Great. Thank you. And first I'd like for Tony Fugett to speak to the CCU just for a moment, please.

MR. FUGETT: Good afternoon. Section 1.4 gives an overview of the Central Collection Unit. Makes for good reading. It talks a little bit about our introduction, what our mission is, the history, our

organizational structure. Talks a little bit about what we do in Collections, the Legal Measures Department, our Accounting staff, and the Program Development staff. And it would make for good reading in terms of what we do. So I won't repeat that today. What it does not say is that we are a special funded organization, and we charge a 17 percent collection fee. And we pay all of our expenses, salaries and everything from that collection fee. They were profitable, and hopefully will remain profitable. We have about 1.7 billion in receivables today of active accounts, and our total receivables are about 2.1 billion.

That's all I have.

MR. WOODWARD: Great. Thank you, Tony.

Okay. Just want to bring everybody's attention to Section 2, the Statement of Work. I wanted to point out a couple of key items. Number one, it is the State's intention to procure a state of the art commercially available DCIS COTS application. So the intent is once again a commercial off-the-shelf. This part of the solicitation is to bring in the core software for the CCU

Program. We do reference in this section that there will 1 2 be a follow-on implementation solicitation, but the focus 3 of this is to strictly stay focused on core COTS software.

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

One of the things I'd like to point out is we are looking for the offerors to identify the total solution, and that should be outlined in Appendix E as Donna had noted before. So all functionality, including any complementary products or third-party applications that are required to meet the requirements.

Another item to point out, and as Donna addressed, we have responded to questions last week. Software configurations and customizations for meeting the RFP requirements, they will be performed in the implementation solicitation and outside the scope of this RFP.

Moving to Section 2.3, the Technical Architecture, we are requesting that offerors recommend the technical infrastructure for what we're calling both the post-award evaluation and the production software environments, and that's to include servers, storage,

networks, devices, operating systems, utilities, security 1 2 and middleware. The State will be providing the 3 infrastructure, and we're looking for the offeror to make recommendations on what technical environment would be 4 most appropriate for their offering. 5 6 Referencing 2.4, Functional and Technical 7 Requirements, that's the majority of the requirements. Basically it's the entire -- requirements that we have 8 9 for the solicitation. We're asking people to follow the 10 instructions accordingly. 11 And those are the main items as far as the 12 summary that we wanted to highlight today. 13 MS. ZIEGENHEIN: Okay. We can take questions 14 now. 15 Question. So basically right now MS. WONG: 16 this is solely procurement of the COTS. The second part 17 you mention like implementation, that will be a second 18 19 MR. WOODWARD: Right. 20 MS. WONG: -- another solicitation. 21 MR. WOODWARD: Yes, that's correct. As it's

outlined in Section 2.1.3, there are two solicitations 1 planned. This one is focusing on the software 2 3 procurement. MS. WONG: So to complete these projects, so 4 5 how many stages will be involved here? 6 MR. WOODWARD: At this stage we have two 7 solicitations planned. 8 MS. WONG: Just the COTS? 9 MR. WOODWARD: The procurement and then the 10 implementation services. 11

MS. WONG: Wait, wait a minute. This one is just procurement of the COTS. Then there will be -- when do you expect the implementation to take place?

12

13

14

15

16

17

18

19

20

21

MR. WOODWARD: Yeah, in Section 2.1.3, it references it could take from one and a half to two years for the next solicitation to be released.

MR. BRISTOW: If I may, Bob, would you -- for questions, if you would stand up and just identify yourself for the record. Beth, we have, we have you recorded.

MS. WONG: Thank you. Beth Wong, Powersolv,

1 Inc. So, again it's two stages that you have. So now 2 it's just a COTS procurement. The second after one and a 3 half years, that will be the implementation, is that 4 correct? MR. WOODWARD: Well, the expectation is it 5 6 could take one and a half to two years for the next 7 solicitation to come through. What we're focusing on this one is the RFP that's due on the 19th of July. 8 9 MS. WONG: Okay. 10 MR. ROBB: Robert Robb with CR Software. 11 Attachment I.1, Functional Technical Requirements, 12 knowing that there might be some COTS software that don't 13 go through all of the different categories such as 14 abatements, payment processing, and that, is there a 15 weight of what is most important versus least important 16 from an evaluation standpoint for the State --17 MS. CROPPER: The requirements are not 18 weighted. 19 MS. WONG: Question again. Beth Wong, 20 Powersolv, Inc. How many agencies are involved here?

FREE STATE REPORTING, INC.
Court Reporting Transcription
D.C. Area 301-261-1902
Balt. & Annap. 410-974-0947

know there's a number of you from the State, you know,

21

15

- 1 | doing the presentation here for this requirement.
- 2 | There's MDOT, there's -- or this is purely MDOT or in
- 3 || coordination they do it?
- 4 | MS. CROPPER: This is a project for the
- 5 | Department of Budget and Management.
- 6 MS. WONG: So the main agency procuring this is
- 7 II DBM.
- 8 MS. CROPPER: That's right. DoIT and -- DoIT
- 9 || is DBM's IT shop.
- 10 MS. WONG: But the recipient of this product
- 11 || is the --
- 12 MS. CROPPER: Department of Budget and
- 13 | Management, Central Collections Unit.
- 14 MS. WONG: Okay. Because I saw some of the
- 15 ||location where the software would be integrated are five
- 16 | places, correct?
- 17 MS. CROPPER: That's right, but it's DBM
- 18 | Central Collections Unit. So CCU provides services where
- 19 | they're needed. It's still CCU's product.
- 20 | MR. NUGGET: And then there are 400 clients
- 21 | that will have access to the system, which would be

||State-wide.

MR. ROBB: I have one more. Can you talk a little bit more about the post-award training for us so we can price it properly? What the expectations of the training would be for CCU staff, DoIT staff on, you know, from an administration side as well as the collection -- the collector side. Be it for lack of a different word, at the end of it where we do the turnkey how extensive is that, is that training on there? Is it completely self-sufficient for CCU and DoIT?

MR. WOODWARD: I mean I can go back to Section 2.11, its very reference to training. And the intent is we have a training that is considered by the offeror appropriate to demonstrate their software. To bring the State up-to-speed so that the system can be used properly.

MS. CROPPER: That's it? Be the shortest Pre-Proposal Conference in history.

MS. WONG: One more.

MS. CROPPER: Okay.

MS. WONG: Follow-up on that, piggyback. The

training is that training the users or training the
trainers? Follow-up his question that he mentioned about
training. Once the software has been integrated, there
will be training so to speak. So would that be training
the trainers within --

MR. WOODWARD: Once again, we are looking for the offeror to provide the recommended training program.

MS. CROPPER: We're not mandating the training. We're asking you to make a recommendation on appropriate training for the product being proposed.

MS. WONG: But you can give us approximately if it is training the trainers rather than training the users, how many people we're talking about.

MS. CROPPER: Tony can talk to how many ultimate end users there are, but we're not mandating that it be train the trainer or train the end user.

Based on your experience with the products you are proposing, we're asking you to tell us what you think the best approach is.

MS. ZIEGENHEIN: Remember, you can always continue to send questions in writing as well. The

cutoff for questions is not until July 5th.

MS. WONG: Okay.

MS. ZIEGENHEIN: So you can continue to send anything that you want an official response, send it in writing.

MR. TEKAMPE: So I have a question. Mike

Tekampe with CGI. So approximately a year ago there was
a procurement for roughly the same scope as what we're
looking for here. I was wondering if anybody can
elaborate on some of the thinking in canceling that
previous procurement and activities that have gone on in
the year since, and then maybe highlight some of the
major changes in this procurement versus the previous
procurement.

MS. CROPPER: Sure. What we did was we went through all of the requirements and determined those that we decided were absolute core requirements. So actually you should see substantial changes in the RFP. So it's not essentially the same at all. It's considerably different in that we've dwindled or focused our attention on those products that we believe are core. And so

- 1 that's the single biggest element that changed.
- 2 MR. TEKAMPE: So more focused on the functional
- 3 | requirements of --
- 4 | MS. CROPPER: That's right.
- 5 MR. TEKAMPE: -- have been changed.
- 6 MS. CROPPER: Um-hmm. Is that it?
- 7 MS. WONG: -- you had mentioned questions due?
- 8 | When -- further question? I guess I --
- 9 MS. ZIEGENHEIN: Yes. I still have a few
- 10 | reminders at the end.
- 11 MS. ZIEGENHEIN: No more questions? Okay. I'm
- 12 | just going to remind you again -- official response, all
- 13 | questions must be in writing. Make sure you allow enough
- 14 | time for the proposals to reach me before the due date
- 15 and time. Proposals must be in two separate files; one
- 16 | marked Technical, one marked Financial, one unbound and
- 17 | five copies of each. A summary of today's meeting and a
- 18 | list of all attendees will be distributed as soon as
- 19 | possible. And the cutoff for questions is July 5th at 5
- 20 | p.m. I believe it's 5 p.m. Yes, July 5th at 5 p.m.
- 21 || If there aren't any other questions, we'll

1	conclude the meeting at this time.
2	(Whereupon, the Pre-Proposal Conference
